

We – grass-roots collectives, journalists, media outlets and NGOs – offer our support to the journalists and NGOs who will be in court on 25 and 26 January, and to all those who are the targets of such gag suits. France needs legislative amendments akin to those adopted in Quebec province and in certain US and Australian states that strengthen freedom of expression and provide better protection for the targets of gag suits. Providing information is not a crime! #We won't shut up!
